

LogiTRACE Version - Unfolding software for Isolation, piping, vessel, ventilation ducting, engineering, and general sheet metal work

LogiTRACE starter kit + kit 1	€ 1245,-
LogiTRACE starter kit + kit 1 as floating server licence	€ 1740,-
LogiTRACE starter kit + kit 1+2+3+ventilation	€ 2295,-
LogiTRACE complete	€ 3295,-

You save €935,- by purchasing complete compared to the price of the individual kits.

LogiTRACE complete as floating server licence	€ 4290,-
--	-----------------

You save €935,- by purchasing complete compared to the price of the individual kits.

Standard PC licence with password	€ 0,-
--	--------------

Program is activated and used on one particular PC, normal software licensing.

USB –Stick (Dongel) for existing Licence	€ 195,-
---	----------------

Floating server licence for starter kit or starter kit+ kit 1	€ 495,-
--	----------------

Floating server licence for complete or other combinations	€ 995,-
---	----------------

Program can be installed and used on any PC connected to the network, but simultaneously only one PC per floating licence. For example with 2 floating licences any 2 PCs connected to the network can work at the same time with the program.

Further licences on the same site 60% of the above prices	€ _____,
--	-----------------

Or as separate kits

LogiTRACE starter kit (always required)	€ 750,-
--	----------------

Approx. 35 very commonly required parts, cones, rectangle-circle, rectangle-rectangle, oblong-rectangle etc,

LogiTRACE classic kit 1	€ 495,-
--------------------------------	----------------

A kit of 43 parts, helps you solve about 80% of all common unfoldings.

LogiTRACE classic kit 2	€ 495,-
--------------------------------	----------------

Several special intersections, a standard vessel with any number of axial pipes, special parts, Archimedes screws ...

LogiTRACE classic kit 3	€ 495,-
--------------------------------	----------------

A selection of modules containing especially various types of Y's and a universal vessel with any number of axial or non axial pipes.

LogiTRACE rectangular ventilation/ducting kit	€ 495,-
--	----------------

Standard rectangular parts for ducting especially useful when the parts are being cut on CNC cutting machines.

LogiTRACE expert 1 – combi-contour, profile, rotated profile and surface XYZ	€ 750,-
---	----------------

COMBI-CONTOUR: module is used to combine any two contours (even DXFs) together and make the unfolding.

PROFILE: A profile can be drawn in any CAD, then extruded to a defined length and cut with two plains at any angle. The profile is then unfolded to give the flat development and 3D model.

ROTATED PROFILE: Great for any form of vessel heads etc. The profile of the figure is drawn in CAD and rotated.

SURFACE XYZ: Allows any normal bending partreat for any form of vessel heads etc. The profile of the figure is drawn in CAD and rotated

LogiTRACE expert 2 – combi-figure, pipeline, LogiUnfold and trousers	€ 750,-
---	----------------

COMBI-FIGURE: Allows two or more 3D figures from LogiTRACE to be combined and calculates the intersection and unfolding. Also ideal for vertically splitting large parts that are too wide or long for the sheet.

PIPELINE: Complete pipeline can be entered using the XYZ coordinates of the pipe axis.

TROUSERS: Trouser with connection of any shape can be made.

Training only required for expert kits, Daily rate €695,- or online hourly rate €95,-

Update from V13 to V14 LogiTRACE Starter kit + kit 1	€ 373,-
---	----------------

Update from V13 to V14 LogiTRACE Starter kit + kit 1 as floating server licence	€ 868,-
--	----------------

Update LogiTRACE V14 Starter kit + Kit 1+2+3+ducting	€ 688,-
---	----------------

Update from V13 complete to LogiTRACE V14 complete	€ 988,-
---	----------------

Update LogiTRACE V13 to complete V14 as floating server licence	€ 1983,-
--	-----------------

All prices in EURO, excluding VAT., Subject to change without notice.
